

bambrella®

For a Greener World

WHY BAMBRELLA®?

- Revolutionary new concept for the outdoor leisure industry.
- 5 year guarantee on frames and hardware.
- Patented designs and technology
- Ecologically sound.
- Extremely robust and weather resistant
- Sizes from 2 to 4 meters.
- Beautiful natural wood look and feel with sleek, modern design.
- Quality 304 stainless steel fittings.
- Specialised bamboo laminating technology.
- Protective oil finish enhancing the beautiful deep golden colour whilst keeping the natural feel.

WHY BAMBOO?

- A large percentage of wooden parasols are made from unsustainable wood.
- Non toxic and non hazardous to the environment.
- Sustainable and renewable.
- Superior density, strength and hardness compared to most hard-woods.
- Bamboo is the fastest growing plant in the world, able to grow on 80% of the worlds surfaces.
- Bamboo absorbs more CO₂ than any other plant or tree.
- Minimizes impact on the environment.
- 100% solid laminated Moso bamboo strips.
- No illegal logging or deforestation.
- Naturally strong and very durable, with a tensile strength similar to steel.
- Resistant to warping, splitting, rot, mould and mildew.
- No splinters or leaching.
- Exemplary quality with a passion for detail.
- Natural beauty with sleek, clean lines.

ABOUT US

Bambrella® designs and manufactures the strongest bamboo, aluminium and stainless steel commercial quality parasols available. Bambrella® Ltd were formed in 2008 by former wooden boat builder Rupert Bottomley, founder and CEO of the Woodstocks International group. The Woodstock group began manufacturing garden furniture and parasols in Indonesia in 1996.

Rupert's vast wealth of experience gained over many years in this industry inspired him to design and create Bambrella® parasols. Bambrella® use unique patented designs and innovative technology to manufacture parasols of unrivalled quality. All parasols are produced in our own factory and are rigorously tested to ensure superior, unsurpassed quality.

In 2010 we expanded our manufacturing operation into China and began the production of Bambrella® parasols. The reason for the move from Indonesia was the plentiful supply of superior Moso bamboo. Moso bamboo is the only bamboo which can be processed and treated for outdoor use. It is also available with FSC® certification.

Bambrella® has proven to be the highest quality laminated bamboo parasol on the market. One reason for its durability is its ability to resist the inherent problem that inferior products suffer, which is mould and mildew occurring when bamboo is exposed to the elements.

This effective resistance has taken years of testing to achieve. Another reason is the patented joint system which enables us to hot press and glue long lengths of laminations. These innovations make it very difficult for other manufacturers to replicate the quality of Bambrella®. Independent laboratory-testing has been conducted for mould and mildew defence and the ability to prevent de-lamination; gives us and our customers' confidence in this excellent product.

Our mission at Bambrella® is to supply commercial, contract and domestic users with a strong, durable and well-designed parasol which will last for many years. At Bambrella® we constantly look to improve and enhance our product range, and we are currently designing and testing an exciting new range of outdoor furniture using high-quality modern materials combined with bamboo.

Bambrella® customers can be assured that materials used in the production of our outdoor furniture and umbrellas are the best available. They can withstand the many differing climates and conditions around the world where our products are found.

A handwritten signature in dark ink, reading 'Rupert Bottomley'. The script is fluid and cursive, with the first name 'Rupert' being more prominent than the last name 'Bottomley'.

Rupert Bottomley, Director
Bambrella®

Bambrella® and the environment

Bambrella® is a certificate holder in the Forest Stewardship Council (FSC®) scheme and we endeavour to source our bamboo through FSC® certified forests. This ensures that our bamboo is well managed, and protects local communities and natural wildlife.

All the materials used in the production of our parasols are 100% recyclable. The oil finish we use has a low VOC and the bamboo is dipped rather than sprayed. The glues we use are European and are rated well within the EU, E1 standard. Recycled materials are used for packaging where possible. All this helps keep the impact of manufacturing on the environment to a minimum. At Bambrella® we understand our social responsibilities and require our international partners to adhere to high levels of welfare, far exceeding local labour standards.

Bamboo information

The process of producing Bambrella® parasols starts with the careful selection of the bamboo. After years of research and rigorous testing we found Moso bamboo to be the only species suitable for outdoor use. One of the characteristics of Moso bamboo which set it apart from over a thousand other species is the size of the individual fibre strands. These strands are much smaller and more tightly condensed and are similar to the structures in fine grained hardwood like teak. We found other bamboos that had larger strands and were not so tightly condensed were more like softwoods, as the fibres/strands would peel individually.

Wind tunnel testing

To ensure the reliability of our parasols, our **bamboo parasols have been tested in a full size wind tunnel up to 90km/h (gale force)**. Our aluminium range have also been tested **up to speeds of 121km/h (hurricane force)**.

The Levante is our premium and most popular parasol, designed for the commercial and high-end domestic markets. It is made using a single piece pole for extra strength and durability, and has simple, clean classic lines, with the contemporary feel of stainless steel and natural bamboo. Our double pulley and rope system ensures easy raising and lowering of the parasols, even on the largest of models.

The Levante range incorporates a turned bamboo hub and runner with stainless steel brackets, a bamboo finial, and an elegant, practical cleat locking system. The covers are attached using our own bolt-down stainless steel rib end protector system or alternatively sewn pockets. The ribs and supporting arms are fitted with stainless steel through bolts, making all the parts easily interchangeable.

LEVANTE SIDE WIND

Technical Data- Levante Side Wind

Material frame: The pole, ribs, hub, runner and finial are all made using laminated bamboo. All metal fittings are 304 stainless steel.

Base frame and post connectors e-coated then powder coated steel.

Opening: A winch system is used using 304 stainless steel wire.

The Levante Side Wind range is our range of large side pole parasols, manufactured and designed to exacting standards with durability, strength and style in mind - the three key points of all Bambrella® products. The Side Wind features a 360° rotating base and 45° tilt so you can still find shade as the sun goes down.

The base weights are made using bamboo which sit in a powder coated steel base frame. The frame has adjustable feet for uneven surfaces whilst protecting the floor at the same time. We use a specialized type of polymer for the bearings meaning that they never seize up or rust.

This parasol was designed for both commercial and domestic use, bringing a magnificent focal point for any situation. We can also supply this parasol with a ground base.

SIROCCO

Technical Data - Sirocco

1 = total height
2 = open height
3 = closed height

Material: The pole and ribs are all made using laminated bamboo. The hub, runner and finial are all made from marine grade nylon PA66.	All metal fittings are 304 stainless steel Opening: A double pulley and rope system is used for easy, light opening.
---	--

The Sirocco is designed for the commercial and domestic markets with the Bambrella® three key points of design - durability, strength and style. The main feature of the Sirocco is the use of nylon for the hub and runner, which have built in rollers for the rope pulley system and a patented locking cleat. This clamps the rope so there is no need for the use of a pin to hold the canopy up.

The smaller sizes of the Sirocco can have a two piece pole using a 304 stainless steel connector allowing for easy storage and transportation.

The Sirocco, like all of our other ranges, has easily changeable parts.

SIROCCO SIDE WIND

Technical Data - Sirocco Side Wind

Material frame:

The posts and ribs are made from bamboo, hub, runner - marine grade nylon PA66.

Base frame and post connectors e-coated then powder coated steel.

Opening: A winch system is used using 304 stainless steel wire.

All metal fittings are 304 stainless steel.

Opening: A double pulley and rope system is used for easy, light opening.

Levante telescopic

The four metre telescopic is our largest parasol and is designed to close over the height of a table. It is a stunning parasol and perfect for commercial use, when needing to shade a few tables. We make this parasol using either the Levante hub and runner or the nylon Sirocco hub and runner.

Sirocco telescopic

ALIZE

Technical Data - Alize

1 = total height
 2 = frame height
 3 = post spacing

Material frame: The pole, posts, ribs, hub, runner and finial are all made using laminated bamboo. All metal fittings are 304 stainless steel. The feet, corner bracket and rib bracket are made from e-coated then powder coated steel.

Shape	Code	Size	Total height	Frame height	Post spacing	No of ribs	Size of ribs
	3.0m SQ-A	3.0m 10'	3.20m 10'6"	2.1m 6'10"	2.8m 9'2"	8	35 x 20mm 1 3/8" x 3/4"
	3.0 x 4.0m REC-A	3.0 x 4.0m 10' x 13.5'	3.40m 11'2"	2.1m 6'10"	2.8 x 3.8m 9'2" x 12'6"	8	35 x 20mm 1 3/8" x 3/4"

The Alize pavilion range is the ultimate luxury space for entertaining and relaxing alike. For those wanting more privacy you can close the drapes on all four sides. The Alize is extremely robust and can be used as a permanent or temporary structure.

The feet at the bottom of the posts can be fixed to any surface using bolts, screws, pegs or you can use our concrete filled bamboo bases. Like all Bambrella® products the Alize is designed for both commercial and domestic use, and this being the strongest design of shade in our collection.

YACHT

The Yacht range has a stainless steel pole used with a canopy from either the Levante, Infinity or Sirocco range giving a more contemporary look whilst still keeping the strength.

A lot of Bambrella's design and construction come from a wooden boat building background and the use of stainless steel and wood/bamboo have always given a nautical feel.

TRI-POD AND CIRCA CHAIR

The Circa chair designed by Nick Rawcliff is unquestionably a chair that is a conversation starter in any location – a singular piece of circular furniture. By adjusting the positioning of the hoops, the carriage of the chair can be altered according to personal preference. The chair folds completely flat for easy storage.

The Tri-Pod frame consists of three laminated poles, making it incredibly strong and capable of holding weights of over 300kg. The webbing strap and bamboo feet prevent the poles from splaying apart on hard ground, for soft ground you simply open the three poles the opposite way, so the angle of the pole ends dig into the ground.

Another feature of the tripod is that it has a stainless steel rotating hanging eye allowing you to effortlessly spin around 360 degrees.

Alternatively, The Circa can be fitted with feet that allows it to be more accessible to indoor areas such as hotel lobbies.

ALUMINIUM RANGE

- Unique, contemporary designs.
- All parts easily interchangeable.
- Highly resistant surface finishes.
- 5 year guarantee
- Patented designs and technology
- Sizes from 2 to 4 metres.
- Exemplary quality with a passion for detail.
- 100% recyclable.

Due to demand from our exiting customers we have developed a range of aluminium parasols which are as strong as the bamboo range with the same points of sale. **Wind tunnel tested up to 121 km/ph**, a three year guarantee, easily replaceable parts and unique designs set them apart from the competition.

Rupert Bottomley the director of Bambrella® has been working on the designs of this range for three years and you can see the knowledge and eye for detail that has gone into this innovative new range of Bambrella parasols.

Our parasols are assembled in the UK. We make our standard ranges as well as custom made parasols of different sizes and shapes. We also make specialised shades and parasols for yachts and super yachts.

Rib finishes

Our aluminium parasols ribs are available in three distinct finishes all with a mirror trim on the rib section..

Decoral Bamboo

Powder-coated in various colours

Sandblasted Anodised

WHY ALUMINIUM?

RIBS

The contrast of the polished silver mirror trim and the anodised, sand blasted finish of the rib give a unique, high end look.

CLEAT SYSTEM

The rope locks into the cleat when the canopy is raised. The double pulley system makes the canopy easy to raise.

HUB AND RUNNER

Marine grade nylon PA66 ensures a strong, smooth, durable opening mechanism.

RIB ENDS

We use stainless steel rib ends with an insert nut and stainless steel bolt to fix the end of the cover for extra strength and clean lines.

EASY OPENING

Sprung loaded ribs for easy opening.

INTERLOCKING PROFILE

Made from high quality aluminium. Designed to achieve extreme strength.

Aluminium finial designs

The oval finial shows the strength of structure and design, giving the illusion of a solid shape when it is actually made up of interlocking eliptacle plates.

The sail finial finishes off the nautical look of this range of parasols, as you can see the different parts of the parasol are shaped like the bow of a classic yacht.

HURRICANE

The Bambrella Hurricane range of parasols is our premium parasol made from aluminium. Our registered design of interlocking profile system makes these parasols one of the strongest available, designed for commercial and high-end domestic markets.

The Hurricane range will withstand all the different, harsh environments around the world and have been tested in winds up to 121 km/ph. All the parts are designed to be easily interchangeable.

We have a choice of finals, made from cast aluminium which gives the final touch to this unique range of parasols.

HURRICANE SIDE WIND

Technical Data - Hurricane Side Wind

The Santa Ana Side Wind is our range of small aluminium side pole parasols, manufactured and designed to exacting standards with durability, strength and style in mind - the three key points of Bambrella® products.

The side wind features a 360 degree rotating base and a 45 degree tilt so you can still find shade as the sun goes down. The base has adjustable feet for uneven surfaces whilst protecting the floor at the same time. We use a specialised type of polymer for the bearings meaning that they never seize up or rust.

This parasol was designed for commercial and domestic use, bringing a magnificent focal point for any situation. We can also supply this parasol with a ground base.

SOUTHERLY

Technical Data - Southerly

Material frame: The posts and ribs - aluminium, hub and runner - single extrusion	Opening: A double pulley and rope system is used for easy, light opening.
--	--

Shape	Code	Size	Total height	Open height	Closed height	Pole size	No of ribs	Size of ribs
	2.5m R-SO	2.5m 8.5'	2.65m 8'8"	2.1m 6'10"	1.24m 6'10"	48mm 2"	6	30x 20mm 1 3/16" x 3/4"
	3.0m R-SO	3.0m 10'	2.7m 8'10"	2.1m 6'10"	1.05m 3'5"	48mm 2"	8	30 x 20mm 1 3/16" x 3/4"
	3.5m R-SO	3.5m 12'	2.8m 9'2"	2.1m 6'10"	0.89m 2'11"	48mm 2"	8	30 x 20mm 1 3/16" x 3/4"
	2.0m SQ-SO	2.1 x 2.1m 7' x 7'	2.75m 9'	2.13m 6'11"	1.10m 3'7"	48mm 2"	4	30 x 20mm 1 3/16" x 3/4"
	2.6m SQ-SO	2.6 x 2.6m 9' x 9'	2.9m 9'6"	2.1m 6'10"	0.86m 2'10"	48mm 2"	8	30 x 20mm 1 3/16" x 3/4"
	3.0m SQ-SO	3.0 x 3.0m 10' x 10'	3.05m 10'	2.26m 7'5"	0.80m 2'7"	48mm 2"	8	30 x 20mm 1 3/16" x 3/4"

Specifically designed for large, commercial bulk orders, the Southerly is the perfect parasol for any company working to a strict budget. Unlike the Hurricane or Santa Ana, the Southerly range features a single extrusion frame and ribs producing a good economic option.

By using the nylon hub and runner from the Hurricane parasol, the Southerly retains its durability, strength and style. The hub and runner has built in rollers for the rope pulley system and a patented locking cleat. This clamps the rope so there is no need for the use of a pin to hold the canopy up.

HURRICANE TELESCOPIC

Technical Data - Hurricane Telescopic

Material frame: The posts and ribs - aluminium, hub and runner - marine grade nylon PA66.	Opening: A double pulley and rope system is used for easy, light opening.

Round telescopic

The Hurricane Telescopic is our largest aluminium parasol and is designed to close over the height of a table. It is a stunning parasol and perfect for commercial use, when needing to shade a few tables.

We make this parasol using the nylon hub and runner.

Square telescopic

HURRICANE EXTREME

The Hurricane Extreme is the strongest and largest of Bambrella's parasols and is designed and manufactured in the UK. The frame is made using 316 stainless steel which is marine polished to a mirror finish like the stainless steel hardware on a yacht's deck. This high polish makes it more impervious to weather as well as making it a real head turner. The canopy material is high performance pvc and the frame is supported using stainless steel rigging which you would usually see holding up the mast of a yacht.

This umbrella is made to last a lifetime.

Even though this parasol can be left open all year round, it is fitted with a geared crank system allowing it to be opened and closed in seconds. Like all Bambrella designs the inspiration comes from the boat building background of the owner of Bambrella, Rupert Bottomley and his team of expert engineers.

Technical Data - Hurricane Extreme

Material frame: The posts and ribs, hub and runner - 316 Marine grade mirror polished finish stainless steel.	Opening: Geared winch system with detachable handle.

The Hurricane Alize pavilion range is the ultimate luxury space for entertaining and relaxing alike. For those wanting more privacy you can close the drapes on all four sides. The Alize is extremely robust and can be used as a permanent or temporary structure.

The feet at the bottom of the posts can be fixed to any surface using bolts, screws, pegs or you can use our concrete filled bamboo bases. Like all Bambrella® products the Hurricane Alize is designed for both commercial and domestic use, and boast the strongest design of shade in our collection.

ECO FRIENDLY

Bambrella® is a brand name known to supply eco friendly commercial parasols, so whether you are a large corporation or small company wanting to promote your brand, what better or more sustainable way is there to advertise than using Bambrella® parasols?

FULL COLOUR PRINTING

All of our covers can be printed on with simple printed text of full colour company logos. For larger orders we screen print on the full roll of material before cutting out the shapes that make up the parasol cover, we call this full colour printing. This is perfect for advertising for businesses large or small.

BRANDING

Bambrella are specialists in branded and printed parasols for all different occasions. Our clients include drinks companies, breweries, distilleries, wineries, coffee shops, restaurant pubs, clubs and other companies from all different sectors who want to promote their brand and quality in style. We can also offer an embroidery or printing service for your logo to be immortalised on our matching cushion covers.

Printing your brand name or message on one of our parasols can help to increase your brands awareness and market identity.

Parasol covers can also be embroidered, although we find that the logo will then be a limited size.

We offer attractive rates for this printing service that have proven to be very competitive. We continued to work with many Multi national businesses and Global brands in various sectors providing clients with unique, eye-catching parasols.

Whatever your requirement, please contact one of our team for a quote or further information.

TABLETOPS

We supply a range of different table tops in three different shapes, round, rectangle and square. The table tops are made from triple laminated bamboo board, which has been treated for outdoor use, but can be also used indoors. The table tops have a thickness of 22mm, bespoke sizes can be manufactured to your specifications.

At Bambrella, we design and manufacture a wide variety of cushions which ensures an exact colour match to your parasol. We provide cushions for Chairs, Benches, Recliners, Outdoor Sofas, Scatter cushions and Sun-Loungers.

For Hotels, Pubs, Restaurants and Golf and Country Clubs, we can have your logo either embroidered or printed onto the cushions to further heighten your brand and image.

Our cushions can be made out of Polyester or Spuncrylic material and we also offer the option of the world renowned Sunbrella fabric with a wide range of different fillers according to your requirements. This makes them hard-wearing, comfortable, resistant to fading and low maintenance.

Matching your cushions to your Parasol is unique to Bambrella®.

BESPOKE DESIGN / OEM

As well as manufacturing the premium, hand built ranges of Bambrella parasols we also manufacture more budget parasols made to the specifications and budget of the customers. The markets we make these parasols for are the big DIY stores and commercially printed parasols for drinks companies and hotel groups etc.

We will design a completely new parasol in house and open new moulds for aluminium extrusions and nylon injection moulds to meet the customers bespoke requirements. We can also use fibreglass rods for ribs.

We make printed pattern covers to your exclusive designs to give your parasol it's own look and feel.

Hurricane parasol with bamboo finish.

We can do solid colours on top with patterns or a range of different stripes underneath.

Our new black and white stripe spuncrylic design

ACRYLIC

We offer sunbrella acrylic for those who want the best cover to suit the Bambrella frame.
Please visit the website sunbrella.com for more details.

PARASOL COVERS

We offer several types of material with different qualities, which give a range of performance depending on the use and the budge to be specified.

Spuncrylic®

Spuncrylic® is polyester that has gone through a process called solution dyeing, giving it very high resistance to fading from sunlight. Spuncrylic® also has good stain resistance and water repellence. In addition it has a UPF of at least 50. This material has a similar performance to acrylic but at a much more affordable price. Other colours are available, please look at the website or contact us for more information.

Polyester

Polyester is a strong fiber that is resistant to creasing and keeps its shape well. The price is quite low in comparison to other umbrella cover materials with the only drawback being the colour fastness of the darker materials. This is why we only offer two natural colours in the polyester material.

Protective covers

All our covers come with an extension pole, which is fitted into a channel in the cover; this enables you to easily place the cover over the top of the Bambrella® while zipping it down for protection and storage.

For the side-wind protective cover there are two extension poles so you can hook the cover over the entire canopy

Spare covers

Bambrella® replacement covers are conveniently packaged and available in a variety of colours, materials, sizes and styles, fitting all our Bambrella® parasols and others depending upon suitability.
